

MiClub Product Version 32 Upgrade Notes: May 2011

Below is a list of changes on the latest MiClub version which will be applied from after the 10th May 2011. The following changes will only affect users who use the following modules:

- MiClub Golf Competition Management
- MiClub Public bookings system

Competition Reports: New Handicap display

Currently; competition result reports include the adjusted handicap value once a comp is submitted to GolfLink. This data needs to be removed off result sheets that are viewed by members from the clubs website as these values are restricted to either viewing from within the club or from GolfLink.com.au specifically. [Click here for more details.](#)

There is a new property option included on the results page (shown in image 2 below) which is used to either add or remove the new handicap values off the results reports. You can click on this link in order to run the results reports with or without new handicap values.

You can still display the Handicap Change report from within the club i.e. posted on boards. After creating reports with new handicap values the pdf reports should be saved or printed off then deleted from the results area so that it isn't accessible for members to view. You can then create reports without new handicap values which are used for member access.

Image 1 below is a sample of the results with the new handicap values removed.

Golflink	H/C	New H/C	Score	Prize
0001210105	11		45	5 Balls
0010350394	35		44	\$15.0
0010350395	30		42	trophy
0001210102	0		36	

This column will be empty now.

Eclectics Update:

Intermittent issue with scores being updated on the eclectic leaderboard has been repaired in this release. We recommend that a Recalculate function be issued to ensure all scores updates are correct from after the upgrade.

A Recalculation of eclectic scores should be done via the button associated with the comp as per the below sample as a once off update. Please ensure this operation is not done prior or during opening of booking sheets.

Status	Leaderboard name	Members	Short description	Report
● Active	Ladies	test		<input type="button" value="Edit"/> <input type="button" value="Delete"/> <input type="button" value="Recalculate"/>
● Active	Mens	Recalculate		<input type="button" value="Edit"/> <input type="button" value="Delete"/> <input type="button" value="Recalculate"/>
