

## **MiClub Sprint 4 May 2012**

### **Major Changes:**

**Prize Accounts Posting Function for VM users:** prizes allocated via the comp management system are only posted to the Infogenesis VM accounts via a new link in the prize allocation screen. The link will be time stamped as well and all postings listed in a new VM integration log. This is to ensure that there should only be the one posting of prizes done.

**Club Leaderboards:** New UI for Club LB management and advert image uploading supporting scrolling pages and separation of grades.

### **Minor Changes/Fixes:**

- Fix for allocation of prizes to all down the line scores (indicated by \*)
- As a VM Integrator, I want to pass payment surcharges from the MiClub product to VM (requires Infogenesis amendment on their side as well to fully implement)
- Fix for Sub 18 hole stroke/nett comps submitting the correct 18 hole equivalent score to golflink.
- Fix for prize reports showing down the line allocations by grades rather than by highest score.
- Golfers who are not registered in a comp cannot submit a score in the manual score entry kiosk page anymore.(a warning message is return when they hit submit instead)
- The bottom of the admin leaderboard page has external leaderboard url links
- Now have the ability to view a log of all transactions that have been sent to POS
- MiTournament system can process IPN (Instant Payment Notification) messages from PayPal .
